MD Samiul Haque

FULL STACK DEVELOPER & ML RESEARCHER

SUMMARY

Full-stack developer and ML researcher with a paper published at UCICS 2025. Builds AI-powered applications with React, Next.js, Node.js, and Python, and has end-to-end experience in ML pipelines from MRI classification to hyperspectral segmentation. Strong in responsive UI/UX and shipping production-grade deployed web applications.

RESEARCH

Transfer Learning for Brain Tumor Detection & Hyperspectral Imaging

Published at UCICS 2025 · Jan 2025

- > Combined CNN architectures for pixel-level hyperspectral segmentation and tumor detection; presented at international conference.

Revolutionizing Brain Tumor Diagnosis via Transfer Learning & DNNs

2024

- > Trained VGG-16 and ResNet-50 on 3,000 MRI scans achieving 97% test accuracy across 4 tumor classes; benchmarked transfer-learning strategies with per-class precision/recall analysis.

EXPERIENCE

Research Officer

Práce BD • Rajshahi, Bangladesh

Feb 2025 – Present

- > Automated processing and validation of 10,000+ records using Python (Pandas, NumPy), cutting manual review time by ~40%.
- > Built reusable reporting scripts generating analytical dashboards that informed hiring and operational decisions across multiple teams.
- > Collaborated with HR and operations stakeholders to translate business questions into reproducible, version-controlled data workflows.

PROJECTS

FlavorBot AI — Smart Recipe Generator

live repo

React Vite Groq API

Jan 2026

- > Built an AI recipe generator using Groq's LLM API with structured JSON parsing and robust error handling for inconsistent model output.
- > Designed a responsive React/Vite UI with sub-2s response times via streaming, deployed on Vercel.

CVAnalyzer AI — AI-powered CV Analyzer

live repo

Next.js TypeScript Groq Llama 3.3 Tailwind

Mar 2026

- > Full-stack AI CV analysis platform with real-time scoring, ATS optimization, skill-gap analysis, and full rewrites via Llama 3.3 70B — no sign-up required.
- > Server-side document processing for PDF, DOCX, and TXT with automated parsing and structured extraction.

Hawa Somachar — Real-Time Weather App

live repo

Next.js 16 TypeScript Tailwind v4 Framer Motion MapLibre GL OWM

May 2026

- > Animated weather app with live forecasts, 24h hourly strips, 5-day outlook, AQI, UV index, and GPS-based location detection.
- > Interactive MapLibre GL map with click-anywhere weather loading, theme-aware tiles, and °C/°F toggle.

Jotion — Job & Internship Tracker

live repo

Next.js TypeScript MongoDB NextAuth.js Tailwind CSS

May 2026

- > Notion-inspired job tracker with dark UI, cover photo support, and full CRUD for per-user job and internship entries with JWT-based auth.
- > Filter tabs, full-text search across position/company/industry/status, slide-in edit panel, color-coded status badges, and toast notifications.
