■ ~/ABOUT \$

Full-stack developer and ML researcher building AI-powered applications with React, Next.js, Node.js, and Python. Published research in brain tumor detection and hyperspectral imaging. Strong in end-to-end ML pipelines, responsive UI/UX, and shipping deployed web applications.

■ ~/SKILLS \$

languages: JavaScript, TypeScript, Python, HTML5, CSS3 databases: MySQL, MongoDB, Firebase, SQLite

frontend: React, Next.js, Tailwind, Bootstrap, Vite backend: Node.js, Express.js, REST APIs, JWT

ml: PyTorch, TensorFlow, Keras data: Pandas, NumPy, Jupyter

deploy: Vercel, GitHub Pages tools: Git, GitHub, VS Code, Figma, Linux

■ ~/EXPERIENCE \$

Research Officer Feb 2025 – Present
Práce BD Rajshahi, Bangladesh

// Automated processing and validation of 10,000+ records using Python (Pandas, NumPy), cutting manual review time by ~40%.

// Built reusable reporting scripts that generated analytical reports informing hiring and operational decisions across multiple teams.

// Collaborated with HR and operations stakeholders to translate business questions into reproducible data workflows.

■ ~/PROJECTS \$

FlavorBot AI – Smart Recipe Generator 25 Jan 2026 | **live** | **repo**
[React] [Vite] [Groq API]

// Built an AI recipe generator using Groq’s LLM API with structured JSON parsing and robust error handling for inconsistent model output.

// Designed a responsive React/Vite UI with sub-2s response times via streaming, deployed on Vercel.

CVAnalyzer AI – AI-powered CV Analyzer 2 May 2026 | **live** | **repo**
[Next.js] [TypeScript] [Groq] [Llama 3.3] [Tailwind]

// Full-stack AI-powered CV analysis platform offering real-time CV scoring and ATS optimization with no user sign-up.

// Implemented CV scoring, skill-gap analysis, improvement suggestions, and full rewrites using Llama 3.3 70B via Groq.

// Server-side document processing for PDF, DOCX, and TXT with automated parsing and structured extraction.

Hawa Somachar – Real-Time Weather App 9 May 2026 | **live** | **repo**
[Next.js 16] [TypeScript] [Tailwind CSS v4] [Framer Motion] [MapLibre GL] [OpenWeatherMap]

// Animated real-time weather app with live forecasts, 24-hour hourly strips, 5-day outlook, and GPS-based location detection — no sign-up required.

// Integrated OpenWeatherMap v2.5 to surface current conditions (temperature, humidity, wind, pressure, visibility), AQI with health descriptions, and UV index with recommendations.

// Built an interactive MapLibre GL map allowing click-anywhere weather loading with theme-aware tiles; implemented °C/°F unit toggle with automatic wind and visibility conversion.

■ ~/RESEARCH \$

Revolutionizing Brain Tumor Diagnosis via Transfer Learning & DNNs 2024

// Trained a multi-class brain tumor classifier (VGG-16, ResNet-50) on 3,000 MRI scans, achieving 97% test accuracy across 4 tumor classes.

// Benchmarked transfer-learning strategies and reported per-class precision/recall to validate clinical reliability.

Transfer Learning for Brain Tumor Detection & Hyperspectral Imaging Jan 2025

// Published at UCICS 2025 – combined CNN architectures for pixel-level hyperspectral segmentation and tumor detection.

■ ~/EDUCATION \$

Varendra University Jan 2021 – Jan 2025
B.Sc. in Computer Science and Engineering CGPA: 3.56/4.00 Rajshahi, Bangladesh

Jamur Islamia College Jun 2018 – Jul 2020
Higher Secondary Certificate (HSC) GPA: 5.00/5.00 Bogura, Bangladesh
